IN THE CLAIMS

Please amend the claims as indicated in the following claim listing:

1. (Previously Presented) A system for on-line viewing of an event at an event site, the system comprising:
  - a) a central site connected to a network,
  - b) a plurality of cameras disposed about an event site, the cameras providing views of the event site from at least two different camera angles, the cameras providing video feeds to the central site via the network,
  - c) means enabling a user to access the central site and to selectively view the event site by means of at least two of the plurality of cameras, and
  - d) a processor generating a smooth transitional view between at least two of the plurality of cameras, whereby a continuous change of camera angle is provided.
